

To be a centre of choice and inspiration for English language education.

April 2015

A monthly newsletter to help you stay in touch with activities at Ascend

GRADUATION TERM 1, 2015

The first term of 2015 was over before you knew it. It was a great term for sure! Here's to wishing all the students who are no longer with us the best of luck in their future endeavours and to those still on their learning journey with Ascend,

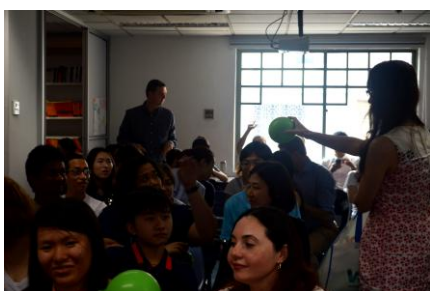

enjoy the ride! ☺

Playing the Easter inspired game.

Our graduating classes

Moving with the times...

We have changed our Mission, Vision and Values to reflect the changes that come with time. Do you know what the new Mission, Vision and Values are?

Our Vision - To be a centre of choice and inspiration for English language education.

Our Mission - To motivate our learners to communicate with confidence.

Our Shared Values - We take PRIDE in our five shared values:

What do you understand by the 5 words **Professionalism**, **Respect**, **Integrity**, **Dynamism** and **Excellence** in the Shared Values above? How can we enact them into our everyday school experience? Do you see examples of them in school? We asked some students and staff in school and this is what they have to say:

Ascend shows **integrity** by being honest with students about their performance - praising them when they have done well and giving them clear recommendations about how they can improve their English in future. Students appreciate this honesty in giving them a realistic understanding about how their knowledge and use of the language is improving.

Ascend demonstrates **dynamism** by striving to constantly improve the learning experience of our students. This means putting our students at the heart of everything we do and continually asking ourselves, our students and our partners how we can do things better. For example, our ECAs have now been re-focused to reinforce target language that our students have learnt in the classroom.

-Tim, teacher

One of my teachers in Ascend demonstrates **professionalism** in teaching! He has the ability to properly convey the meaning of words without a translator! He also organizes many games in the classroom. I think these are also examples of professionalism! He knows how to keep us interested.

-Elena,
Intermediate 2

Our teacher is very good and friendly. Teachers and students listen to and **respect** each other.

-Hanu & Lee,
Elementary

We strive for excellence in student service when we attend to students, both prospective and current students. Also, we try to achieve excellence in our team work in order to achieve company target.

-Hai Yen, Marketing staff

We hope the new Mission, Vision and Values will make Ascend a better place for students and staff!
